1. Introduction

The Fire and Rescue National Framework for England (2018) provides overall strategic direction to English Fire and Rescue Authorities (FRA). It sets out the Government's priorities and objectives and places a requirement on all FRA's to provide assurance to their communities and to Government on financial, governance and operational matters.

This Statement of Assurance aims to provide the necessary accountability and transparency to the people of Lancashire and evidence that their Fire and Rescue Service continues to deliver under the expectations detailed within both the National Framework and our own Integrated Risk Management Plan (IRMP).

This statement sits alongside our IRMP, Statement of Accounts, the Annual Governance Statement and recently re-designed Annual Service Plan and Annual Service Report. It details what measures are in place to assure that the Combined Fire Authority's performance is efficient, economic and effective.

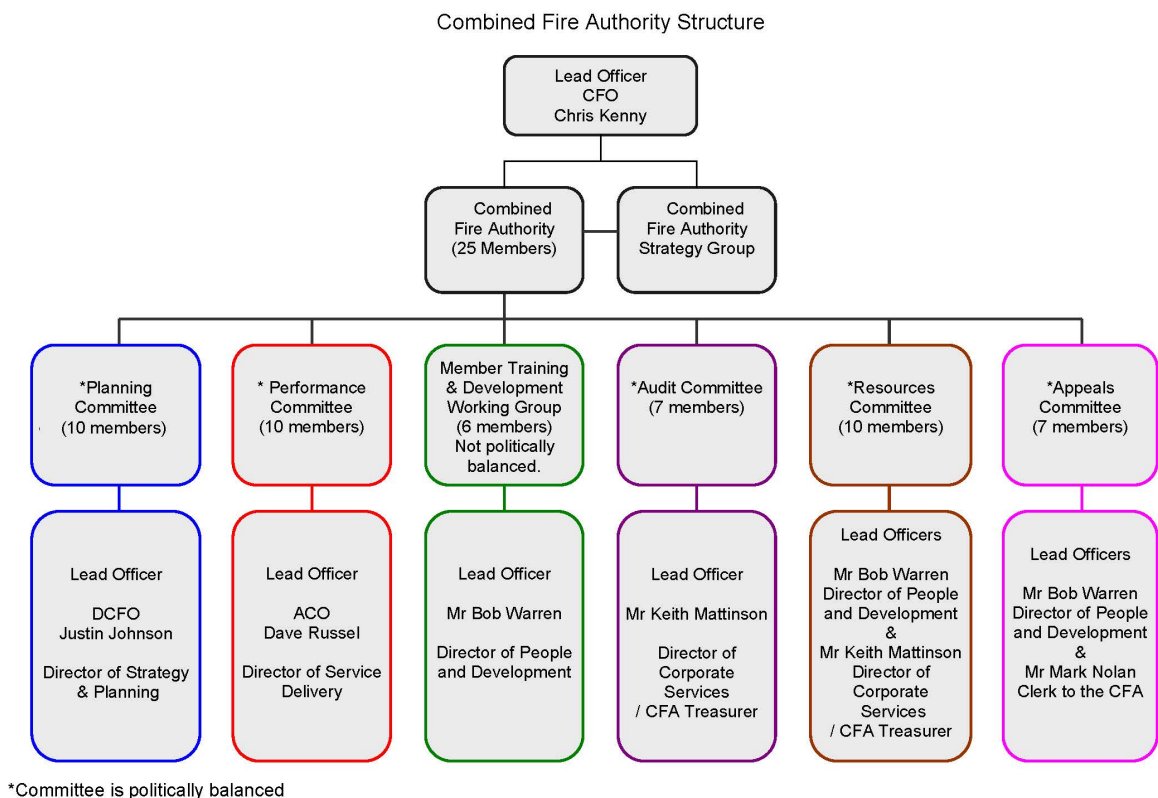

Lancashire Combined Fire Authority

Lancashire Combined Fire Authority (CFA) is made up of 25 elected councillors drawn from Lancashire County Council (19) and the unitary authorities of Blackburn-with-Darwen (3) and Blackpool (3). The CFA is responsible under the Fire & Rescue Services Act 2004 for providing a Fire and Rescue Service in Lancashire. This involves the provision, training and equipping our staff to undertake firefighting operations, fire safety work, rescue of persons from road traffic collisions and preparing for our response to other emergency situations. The CFA is the body legally responsible for enforcing the Regulatory Reform (Fire Safety) Order 2005 and is a designated Category 1 responder under the Civil Contingencies Act 2004.

The CFA ensures that the work of the Fire and Rescue Service is efficient, effective and provides best value. To achieve this, they operate under a framework of five full meetings each year (Figure 1), which are supplemented by a number of smaller committees focusing upon Planning, Performance, Resources, Audit and Appeals.

Further information on the afore-mentioned committees is accessible via our website at <https://cfa.lancsfirerescue.org.uk/>

Figure 1 - Combined Fire Authority structure

The County of Lancashire

Lancashire comprises 14 districts, 12 which are within the Lancashire County Council area (Burnley, Chorley, Fylde, Hyndburn, Lancaster, Pendle, Wyre, Ribble Valley, Rossendale, South Ribble, West Lancashire and Preston) and 2 unitary authorities of Blackpool and Blackburn-with-Darwen. The area is home to a resident population of circa 1.46 million people (Census 2011) and is one of the most populated and urbanised shire counties within Great Britain, with a legacy of historical, industrial heritage.

Lancashire covers just over 3,000 square kilometres including 123 kilometres of coastline stretching from Morecambe Bay in the north of the county, down to the sands of West

Lancashire in the south. The County has an extensive motorway network, port facilities, nuclear installations and airports and is home to a diverse demographic, with almost 20% of our population being over retirement age and 10% representing Black and Minority Ethnic (BME) communities.

The County is bordered by Cumbria to the north and North Yorkshire, West Yorkshire, Greater Manchester and Merseyside moving from east to south. The major conurbations are Lancaster, Preston, Burnley, Blackburn, Accrington, Chorley and the seasonal town of Blackpool which receives around 16 million visitors per year.

Lancashire Fire and Rescue Service (LFRS)

LFRS is the service provider on behalf of the CFA. We currently operate from 39 locations (with 58 front-line fire engines and a fleet of specialist vehicles), a specialist Urban Search and Rescue unit, Service Headquarters in Fulwood and our Service Training Centre in Euxton, Chorley. LFRS staff deliver an extensive range of prevention, protection and emergency response services throughout Lancashire.

To deliver these services, we employ circa 1000 operational staff in a wide variety of roles using a variety of shift systems; Whole-time, Retained, Day Crewed, Day Crewing Plus and Day Duty (Figure 2).

Our Mobilising and Control Centre moved to North West Fire Control (NWFC), Warrington in 2014. We work collaboratively with Cumbria, Greater Manchester and Cheshire Fire and Rescue Services.

Figure 2 - Service Delivery Areas and Fire Station locations

2. Financial Assurance

All local authority accounts are required to adopt ‘proper accounting practice’ based on either statutory requirements or the code of practice on local authority accounting. These specify the principles and practices of accounting required to prepare a Statement of Accounts that ‘present a true and fair view’.

The Treasurer to the CFA provides publically available annual accounts which are approved by the Resources Committee.

An independent audit of the accounts is undertaken by an external auditing body, Grant Thornton. The external auditor undertakes a review of the accounts and forms an overall

opinion which is published in September of each year. The audit for 2017/18 was conducted in accordance with the Local Audit and Accountability Act 2014 and provided the following –

- An unqualified opinion on the accounts which gives a true and fair view of the Authority's financial position as at 31 March 2018 and its income and expenditure for the year.
- An unqualified conclusion in respect of the Authority's arrangements for securing economy, efficiency and effectiveness in its use of resources.

A copy of the Statement of Accounts 2017/18 can be found [here](#).

A copy of Robin J Baker's audit report on behalf of Grant Thornton's can be found [here](#).

3. Assurance on Governance

The Accounts and Audit Regulations 2015 require the CFA to publish an Annual Governance Statement along with the Authority's financial statements, following a review of the effectiveness of the internal controls in place. It sets out the key elements of the Authority's governance framework, how these have been evaluated, the outcome of the assessment of effectiveness and any areas for improvement.

The Audit Committee has approved and adopted an updated Code of Corporate Governance, in line with guidance produced jointly by CIPFA (Chartered Institute of Public Finance Accountants) and SOLACE (Society of Local Authority Chief Executives). The Code defines corporate governance as the way an authority ensures that it is doing the right things, in the right way, for the right people, in a timely, inclusive, open, honest and accountable manner.

Included within the Code are the following core principles:-

1. Behaving with integrity, demonstrating strong commitment to ethical values, and respecting the rule of law;
2. Ensuring openness and comprehensive stakeholder engagement;
3. Defining outcomes in terms of sustainable economic, social, and environmental benefits;
4. Determining the interventions necessary to optimise the achievement of the intended outcomes;
5. Developing the entity's capacity, including the capability of its leadership and the individuals within it;
6. Managing risks and performance through robust internal control and strong public

financial management;

7. Implementing good practices in transparency, reporting, and audit to deliver effective accountability.

The code also sets out the principles which support each of these core elements, as well as how the Authority will address each of these.

The Authority has responsibility for conducting, at least annually, a review of the effectiveness of its governance framework including the system of internal control. The 2017/18 review was supported and informed by the work of both internal audit, which is undertaken by Lancashire County Council, and external audit, which is undertaken by Grant Thornton. This self-assessment formed the basis of the Authority's [Annual Governance Statement for 2017/18](#), which concluded that Lancashire Combined Fire Authority and Lancashire Fire and Rescue Service has in place a satisfactory system of internal control which facilitates the effective exercise of its functions and which includes arrangements for the management of risk, and that no significant governance issues were identified.

4. Operational Assurance

The National Framework outlines the requirement placed upon FRA's to provide assurance on operational matters which are determined locally by them in partnership with their local communities; citizens, businesses and others.

FRA's function within a clearly defined statutory and policy framework of which the key legislative documents defining these responsibilities are:

- Fire and Rescue Services Act 2004
- Civil Contingencies Act 2004
- Regulatory Reform (Fire Safety) Order 2005
- Fire and Rescue Services (Emergencies) (England) Order 2007
- Localism Act 2011
- Fire and Rescue National Framework for England.

This section aims to provide assurance that our service is delivered in line with our statutory responsibilities and with due regard to the expectations set out in our IRMP including cross-border, multi-authority and national incident arrangements.

Integrated Risk Management Plan (IRMP)

Our Integrated Risk Management Plan (IRMP) is a public facing document covering the period 2017-22. This plan is in place to provide the opportunity for LFRS to demonstrate how, we as an organisation, identify and assess all foreseeable fire and rescue related risks and challenges that could affect our communities over the 5 year period and how we plan to mitigate such risks or reduce their potential impact.

Key to the successful identification and management of risk is our ability to maintain a clear and current understanding of the present and future threats to Lancashire's communities. Risk in Lancashire remains dynamic, constantly changing and differs between districts, which requires varying preventative activities. As a result, no single activity to reduce risk is adequate in all circumstances and a mix of prevention, protection and response activities delivered by a range of organisations is needed to reduce the likelihood of the risk event occurring or to lessen its consequences. This depth of understanding underpins everything we do, driving our governance and planning arrangements; our findings are published within the [Strategic Assessment of Risk](#).

Planning & Performance

To meet the requirements of the IRMP the Service reviews its priorities and targets annually, this supports continual improvement and provides the opportunity to ensure that we undertake activities dependent on the requirements of our environment. Our Corporate planning process has been developed to provide a rigorous yet flexible process that allows the Service to assess and respond to opportunities and threats as and when they emerge. Whilst the IRMP is in place to set out the strategic direction of the Service in the medium term, the Service also has in place a forward-looking [Annual Service Plan](#) which clearly sets out what we will deliver over the coming 12 months, this is complimented by the [Annual Service Report](#) which reflects our achievement against those objectives at the year end.

In addition to this on a quarterly basis, we produce a performance management report known as '[Measuring Progress](#)'. The content of this report is considered at Senior Management Team meetings and by the Performance Committee of the CFA.

Consultation

External and internal consultation is an essential part of the development of the IRMP and subsequent reviews, and as such we have a clearly defined [Consultation Strategy](#). We use a variety of methods for engaging with community members and for every consultation exercise completed, a summary report is provided to the relevant committee of the CFA. This process ensures that potential stakeholders are consulted, involved and informed of the

proposals to ensure that their input is considered within the final plans.

Community Risk Management

Our approach to integrated risk management is supported by the use of modelling. The Office of National Statistics categorises every part of the UK into a small neighbourhood called a Lower Layer Super Output Area (SOA). There are 941 SOA's in Lancashire, each containing around 1500 people. We use information about where fires have taken place in the past and combine this with various social deprivation data to give each area a risk grade.

The information is then used to identify geographic areas at higher risk where a combination of Prevention, Protection and Response activities can have the greatest impact.

This is utilised alongside the provision of a tailored Home Fire Safety Check service (HFSC) which is geared towards occupant risk and importantly, to those in greatest need and at greatest risk of fire.

We update the risk model on a regular basis and use the outcomes to direct and reprioritise our activities. Risk reduction progress over the last 11 years is depicted in the table below.

	VERY HIGH	HIGH	MEDIUM	LOW	OVERALL SCORE
	SOA Count	SOA Count	SOA Count	SOA Count	Risk Score Change
2008	87	124	301	428	39022
2009	70	119	299	452	37202
2010	60	118	310	452	36532
2011	60	114	303	463	36238
2012	53	100	313	474	35558
2013	40	93	301	507	34228
2014	32	95	306	508	33648
2015	41	86	281	533	33268
2016	32	76	314	519	32990
2017	25	74	321	521	32398
2018	22	74	321	524	32114
OVERALL CHANGE	-75% ↓	-40% ↓	7% ↑	22% ↑	-18% ↓
	OVERALL REDUCTION IN VERY HIGH RISK SOAs	OVERALL REDUCTION IN HIGH RISK SOAs	OVERALL INCREASE IN MEDIUM RISK SOAs	OVERALL INCREASE IN LOW RISK SOAs	OVERALL REDUCTION IN RISK SCORE

Figure 3 - Changes in Fire Risk 2008-2018

Prevention, Protection and Response

Over the course of our previous IRMP (2013-17) our Prevention and Protection activities and services were reviewed to ensure that we continue to deliver services in line with our changing environment. Prevention activities are now focussed around four key themes helping people to Start Safe, Live Safe, Age Safe and be Safe on our roads with a focus on working collaboratively with other organisations.

To further complement this we have changed our working practices to transform our Home Fire Safety Check Service to a Safe & Well Service. Delivery methods for this Service have been improved to provide a more targeted risk based approach for home visits. The service now includes brief intervention and advice to reduce risk, falls risk assessments, alcohol and mental health advice and access to other services. This provides the gateway for further collaboration with colleagues in health and social care with a joint aim to improve the health and quality of life for those most at risk in our communities.

Protection services have been transformed to help the businesses of Lancashire in being more compliant with fire safety regulations, by providing information and access to a great range of services through a business support function. We have continued to develop and establish Primary Authority schemes with an aim to develop effective partnerships with businesses, in order to provide reliable and consistent regulatory advice in relation to fire safety.

Furthermore in July last year, following the Authority's Planning Committee approval, the Service went out to consultation on proposals detailed within an Emergency Cover Review. This review is undertaken periodically and involves a detailed study of activity levels which informs our risk based approach to provide the most appropriate and effective emergency response provision to the communities of Lancashire.

Assuring ourselves that on our Fire Stations, we are training effectively, preparing for response by gathering risk information, broadening our understanding of risk, so that our prevention and protection activities are as focused and effective as they can be is nothing new to LFRS. However, there was evidence to support the need to review how we currently provide assurance and therefore continue to improve.

The service Operational Assurance Team (OAT) are working to assure that key priorities such as improving the service we deliver to our communities and supporting firefighter and public safety are consistent across the county. The approach to how the work is carried out is very

much about being supportive to staff, sharing good practices, developing better ways of doing things and therefore contributing to improving service delivery as a whole.

Mutual Aid Agreements

The National Framework states that Fire and Rescue Authorities must make provision to respond to incidents such as fires, road traffic collisions and other emergencies within their area and in other areas in line with mutual aid agreements. LFRS maintain mutual agreements for reinforcements with our five bordering Fire and Rescue Authorities - Cumbria, Greater Manchester, Merseyside, North Yorkshire and West Yorkshire. These agreements are periodically reviewed to maintain currency and provide optimal response arrangements.

National Resilience

For the purposes of this document, National Resilience (NR) is defined as the capacity and capability of Fire and Rescue Authorities to work together and with other Category 1 and 2 responders to deliver a sustained, effective response to major incidents, emergencies and disruptive challenges, such as (but not limited to) those identified in the National Risk Register of Civil Emergencies. It refers to risks that need to be planned for on a strategic, national basis because their impacts and consequences would be of such scale and / or complexity that local resources would be insufficient, even when taking into account mutual aid arrangements.

LFRS is a signatory to the National Mutual Aid protocol and has deployed assets to major incidents outside the region. The costs of such mobilisations are borne by the FRA within whose area the incident occurs and are therefore re-claimed by LFRS.

We remain subject to the National Resilience audit processes which test the various aspects of our NR capabilities. National Resilience has transferred from The Home Office to Merseyside Fire & Rescue Service as the Primary Authority.

Business Continuity

Business Continuity Management (BCM) is an integral part of our corporate risk management process. In relation to BCM processes and procedures, all FRA's have to satisfy the requirements of both the Civil Contingencies Act 2004 and Fire & Rescue Services Act 2004.

We are required to 'write and maintain plans for the purpose of ensuring, so far as reasonably practicable, that if an emergency occurs the Authority is able to continue its functions'. This includes periods of industrial action.

In order to ensure that Lancashire Fire and Rescue Service comply with both pieces of legislation, our plans have been developed in line with national best practice. Our Business Continuity Plan (BCP) provides a framework for the activation, allocation and deployment of

Lancashire Fire and Rescue Service's resources for any event or occurrence which impacts on the normal day-to-day functions of the Service. The plan applies to the provision of all critical activities, including support functions.

Our business continuity policy provides a framework through which:

- Critical processes are identified
- Assessments of both internal and external risks which may impact on business continuity are made;
- Strategic and Tactical Plans have been produced to ensure an acceptable level of service can be maintained following disruption;
- Procedures are developed to invoke the BCP;
- Arrangements are made to test the BCP;
- All key personnel are trained to understand their role within the plan;
- Responsibilities are clearly identified and assigned.

In 2016 a full review of our Business Continuity arrangements was completed to ensure that plans continue to follow the Business Continuity Institute of national best practice. Each year testing is undertaken to ensure our plans are fit for purpose, with the last formal exercise taking place in December 2017. This exercise involved an influenza pandemic extended over a number of weeks and involving up to 50% of the workforce, learning points identified are being to be progressed by a Service action plan. Although not a formal test, the protracted Winter Hill incident demonstrated the Service's ability to deal with a Major Incident, whilst at the same time responding to other emergencies in a timely manner and continuing with business as usual, as much as reasonably practicable.

Safety, Health & Environment

The Combined Fire Authority meets regularly to consider local and national Safety, Health and Environment issues and to provide strategic political leadership to the Service. The Authority has overall responsibility for the effective governance of Safety, Health and Environment, including agreeing the Safety, Health and Environment Policy and ensuring adequate resources are available to manage performance effectively. Overall responsibility for management is delegated to the Chief Fire Officer.

Our Health and Safety Management System (HSMS) is based on the model Plan, Do, Check, Act laid down in the Health and Safety Executive publication HS(G)65 – Successful Health and Safety Management and written and implemented to the standard for Health and Safety Management Systems, OHSAS 18001:2007. The Environmental Management System (EMS)

is written and implemented to the International Standard ISO 14001:2015. Certification for both standards has been in place since 2011/12 with re-certification taking place every 3 years followed by annual surveillance audits. The last successful audit took place in 2018, where accreditation was extended.

As part of the audit process, the auditors visit a range of stations and departments and examine the 'Full provision of fire, rescue and supporting services across Lancashire' delivered by the Combined Fire Authority from a health and safety and environmental perspective.

Each year a performance review of Safety, Health and Environment is carried out and reported to the Combined Fire Authority in the [Safety, Health and Annual Review report](#). Part of business-as-usual is the review of all policies, procedures, instructions and guidance to ensure that we continue to meet our legal obligations in respect of safety, health and environment and we validate this by a system of peer review and internal audits.

To ensure continuous improvement is made in both the HSMS and EMS, we have developed an action plan to assist in delivering future improvements.

Training and Development

Lancashire Fire and Rescue Service Training and Operational Review policy is designed to provide training and development to personnel to enable the organisation to fulfil its vision of 'Making Lancashire Safer'. Training is based on the needs of the organisation with a strong focus on ensuring that personnel are safe and competent in the delivery of the prevention, protection and response services we provide.

The training programme takes into account learning identified through our own operational review processes as well as from reports describing learning from events of national significance. The training department supports continual learning and organisational development through a wide range of programmes tailored to role and responsibility, as well as managing the selection processes which identify managers for advancement. Ongoing development and maintenance of competence is a key focus and this is facilitated through a robust maintenance of skills programme linked to an e-learning system which is continually updated.

Trainers are selected and developed across an extremely diverse variety of specialisms ranging from the intricacies of boat handling and rope rescue through to the complexities of mounting a successful fire safety prosecution. Where necessary, support is commissioned from specialist providers.

5. Assurance Declaration

The Chairman of Lancashire Combined Fire Authority and Chief Fire Officer of Lancashire Fire and Rescue Service are satisfied that the Authority's financial, governance and operational assurance arrangements are adequate and operating effectively and meet the requirements detailed within the Fire and Rescue National Framework.

Chris Kenny - Chief Fire Officer

Frank De Molfetta – CFA Chairman
