KEY RISKS		RISK MITIGATION/CONTROLS IN PLACE	LIKELIHOOD	IMPACT	RESIDUAL RISK	ACTIONS RECOMMENDED	BY WHEN	BY WHOM	RISK OWNER	DIRECTORATE
1	Insufficient resources due to poor funding settlement, inability to make required savings, additional financial pressures such as RDS pensions etc., plus council tax limits via local referendum resulting in Authority being unable to set a balanced budget.	The Government has confirmed that the multi-year settlement offers have been agreed with all single purpose fire and rescue authorities. The Final Settlement for 18/19 was in line with the four year settlement previously agreed. Next year's draft settlement was also in line with previous figures. Hence, barring exceptional circumstances, we anticipate next year's settlement showing a funding reduction of £0.5m. However there still remains some uncertainty surrounding the impact of Brexit. In addition the Government is currently consulting on a Fair Funding Review and changes to the Business Rates Retention Scheme, both of which may impact on future funding Based on current budget estimates we will be faced with a funding gap of £1.2m in 19/20 (assuming council tax is increased by 3%). The Authority will continue to review opportunities for further savings. The Authority holds sufficient reserves to enable it to meet this funding gap in the short to medium term.	3	3	9	Continue to monitor position and review implications arising from Brexit, fair funding review and Local Retention of Business Rates. Continue to identify savings opportunities	31/03/2019	DoCS	DoCS	Corp Serv
2	Premises Risk Information: That operational staff do not have available adequate and reliable premises information to efficiently resolve operational incidents: Risk information is provided to operational staff based on premises information and premises risk are identified on a continuous basis although this is not consistent throughout the Service.	The gathering of operational risk information is a key activity within LFRS. The service has adopted an integrated approach to managing the risk; thereby ensuring safe systems of work for all employees. LFRS will undertake incident pre planning and the gathering of operational risk information to enable: *The prevention of injury and ill health of firefighters and other emergency responders *Management and mitigation of risks in the community *Continual improvement in the provision of, accurate, relevant and timely operational information *Compliance with the legal duties on Fire and Rescue Authorities in relation to operational risk information *Compliance with formal guidance and "best practice" models; and Audit and review mechanisms. Premises based risks are assessed using the Provision of Risk Information to Staff (PORIS) methodology. The risk based information is formulated via an application on the iPad and categorised from Level 1 through to Level 5 (e.g. Top Tier COMAH Sites.) All known high risk premises are recorded on the system.	3	3	9	The Operational Assurance Team have been commissioned to carry out the independent scrutiny, with 18 SSRI reviews (across varying levels) planned to complete by March 2019. A key priority through 2019 / 20 is the review of SSRI plans associated with High-rise Buildings across Lancashire. This will be completed jointly by operational crews and Fire Protection staff members. Information Sharing Agreements with neighbouring FRS' are ongoing in readiness for digital cascade of risk information exchange for premises within 10km of a county border.	31/12/2019	HoSD	DoSD	Serv Delivery
3	Insufficient staffing resources, due to Industrial Action, to deal with operational demand and fulfil statutory responsibilities.	LFRS has a separate contingency plan in place that is specific to industrial action. The Home Office has undertaken an audit of our arrangements, with the final reported awaited	3	4	12	Await the final report from the Home Office audit. Continue to monitor the position regarding national pay awards	31/03/2019	HoSD	DoSD	Serv Delivery

4	Lack of availability of water supplies for fire fighting prevents effective fire fighting resulting in additional damage to property and increased risk to life.	The Service commissions, adopts, systematically inspects and repairs mains fed fire fighting hydrants across the County. We maintain operational plans that display the location of available hydrants and open water supplies. Accurate hydrant information now provided to FES. Hydrant inspections moved to a risk based programme. New SSI Hydrant Manager update - Central system (within FES) is now up and running with current information being available on appliance MDT's. Hydrant tech's now moved over to Toughbook's for hydrant management and reporting of defects. We have Strategic Hydrants (those with a flow rate of above 1,500 litres per minute), then Risk Category 1, 2 and 3. Strategic are tested annually, Risk 1 annually, Risk 2 every two years, and Risk 3 every three years. Defects are repaired either in-house by the Hydrant Technicians, or reported to United Utilities (Strategic being marked urgent). Strategic Hydrants are always flow tested and this is recorded on the hydrant asset in SSI. Other hydrants are dry tested Increased use of HVP for larger incidents.	2	3	6	Discharged				
5	The increasing age profile of operational staff could adversely affect our ability to deliver effective emergency response.	Fitness Assessments introduced and included as part of the Crew Training as of 1st April 14. Remedial action to ensure that acceptable levels of fitness are developed and maintained. Provision of facilities for physical exercise and training on operational stations. Currently staff are timetabled to take a fitness test, are subject to health monitoring and managers can refer staff to OHU if they have concerns. The Service provides a physiotherapy service, critical incident debriefing and counselling if needed.	3	2	6	Discharged

6	Operational staff do not have the required skills to operate safely at an incident with the potential to result in F/F injuries or fatalities.	Recruitment of Whole-time and RDS staff is undertaken against national standards. Initial and Continuation training delivery is based on National Occupational Standards (NOS), National Operational Guidance (NOG) and Training Specifications. Role related competencies have been identified and recorded within the PDR Pro system with appropriate retraining frequencies identified. Initial and Refresher training delivered to cover a wide range of specialist skills. Particularly risk Critical areas such as Breathing Apparatus are centrally assessed to ensure uniformity. An Operational Assurance policy is in place delivered through a dedicated Operational Assurance Team that continually assesses operational readiness through station visits, incident / exercise monitoring and debriefing. The team publishes a quarterly performance report to promote staff awareness of key operational performance issues. As well as internal learning sources, the team receives National Operational Learning (NOL) in relation to nationwide incidents, Rule 43 Letters and Joint Operational Learning from other blue light Services and Resilience Forum Partners. Such learning results in a range of actions including REC1 safety bulletins, changes to operational policy and training content (both courses and e-learning) and thus constant evolution/improvement in safety and effectiveness. A dedicated Incident Command Training team has been established recognising the vital importance of this skill to safe and effective operations. Retained Support Officers have been appointed and their responsibilities include recruitment and training. The Service continues to invest in training props to ensure realistic hot fire training conditions. Through the Operational Assurance Group, Prevention, Protection and Response Task and Strategic Groups along with the Health, Safety and Environment Advisory Groups, internal and external learning are monitored and fed into the Training and Operational Review department to influence operational training.	3	3	9	Embed new arrangements. Monitor effectiveness of Operational Assurance Performance Report in disseminating information	31/03/2019	HoTOR	DoSD	Serv Delivery

KEY RISKS		RISK MITIGATION/CONTROLS IN PLACE	LIKELIHOOD	IMPACT	RESIDUAL RISK	ACTIONS RECOMMENDED	BY WHEN	BY WHOM	RISK OWNER	DIRECTORATE
7	Failure of key ICT systems resulting in disruption to services.	Separate BCP plans developed, including backup and recovery procedures, desktop exercise completed. Asset replacement policy in place, regularly reviewed. IT Firewall to prevent inappropriate access, moisture detection loop installed in SHQ plant room to identify any early threat of flooding Secondary ICT site constructed at STC to provide enhanced resilience, implementation of Active Directory to enhance security and control of user access, improved virus protection. Strategy to control use of USB devices implemented. Patch and update policy place to ensure servers and workstations are up to date with latest security developments. Wide Area Network (WAN) to all administrative and operations site. New Storage Area Network (SAN) to replicate all essential servers and data to the disaster recovery site at STC. Installed resilient link from STC to County Hall in order to maintain LCC/OCL supplied services in the event of a failure at SHQ or the link to County and also have extended the network to include the new control facility in Warrington.	3	3	9	The planned strengthening of the NWFC Data Centre is under way with the equipment required on order, the additional resources for Systems Engineering have allowed ICT to develop a programme of modernisation to the ICT infrastructure which will see upgrades to some of our key architecture completed by the year end. The WAN Replacement is currently in design and will also be delivered by the end of the year , this will significantly enhance our network resilience. We are also looking at the vacant Network Security Manager role to rewrite the job description to align with the developing cyber security and information governance requirements of the Service.	30/06/2019	HoICT	HoICT	Strategy & Planning
8	Loss of corporate reputation through negative publicity.	Emergency communication plan and toolkit covers all aspects of risk including business continuity issues, emergencies and broader reputational risk, and fulfils requirements of the Lancashire Resilience Forum emergency communications plan. Documents were updated in September 2018 following Winter Hill moorland fire learning. Plan regularly tested during exercises. Effective reactive press office and proactive media activity to build positive reputation including on-call arrangements for out-of-hours cover. Media and social media training forms part of middle manager development programme and is delivered to individuals and teams as required throughout the year. A social media management tool was procured in February 2018 which provides ability to monitor and manage, if required, social media activity by stations. Communication plans for all corporate projects include internal communication to ensure staff are well informed to reduce risk of misinformation. Corporate use of social media is embedded in communication plans with policy and guidance in place. Scanning and planning function helps anticipate and plan for specific reputational risks and daily media monitoring highlights inaccurate reporting and emerging issues that that need to be addressed or corrected.	3	3	9	Revised image consent forms have been produced in line with GDPR however social media guidelines are yet to be updated in respect of images and personal data, as a preferred method of processing and storing images has yet to be determined by the Service. In addition to the middle manager development programme, media and social media training continues to be delivered to staff in departments and on stations on an ad hoc basis by the communications team.	31/12/2019	HoCC	HoCC	People & Development

KEY RISKS		RISK MITIGATION/CONTROLS IN PLACE	LIKELIHOOD	IMPACT	RESIDUAL RISK	ACTIONS RECOMMENDED	BY WHEN	BY WHOM	RISK OWNER	DIRECTORATE
9	Retention and recruitment of RDS staff impacts on RDS appliance availability.	RDS recruitment and retention working group established. Increased RDS basic recruits course population from 12 to 24. Quicker access to BA course on completion of recruit training. TOR support throughout the RDS probationary period. Enhanced retained pay scheme introduced and reviewed regularly. The service allows shorter RDS contracts to improve appliance availability. Encourages dual contract staff to contribute to the RDS. RDS availability targets now reduced to 95%. Proactive recruitment by SDM's. Joint working between HR and service delivery to enhance current recruitment processes. RDS Strengthening & Improving programme in place with the focus on supporting staff through their developmental stages and improving efficiency and effectiveness of recruitment work. A new Recruitment Vehicle has been established. RSO activity around both development and recruitment are paying off with improved levels of support being given across all required skill sets to those in the Service and those looking to join us.	3	3	9	RSO's continue to embed 'core skills' workshops on stations and STC staff routinely delivering Incident Command skills across a variety of topics to RDS staff to improve competency as well as sense of feeling valued. Activity around RDS recruitment campaigns will continue to develop. For those who fail the RDS course the RSO's maintain contact and developmental work with a view to attendance on subsequent course. Monitor success of initiatives	31/12/2019	HoSD	HoSD	Serv Delivery
10	Lack of workforce planning resulting in significant over/under provision of staff and resulting impact on service and finances.	A mechanism of workforce planning has now been agreed and this will be reviewed on annual basis. As part of the development of the workforce plan a review of retirement profile is considered which is the main reason for turnover for those staff on grey book terms and conditions, this information is used to plan recruitment and enables us to plan effectively ensuring enough staff. Further to the turnover last year, an internal recruitment campaign and associated recruitment resulted in recruitment to 27 posts. A further recruitment campaign is being conducted for 2017/18 which will be completed by mid-May. Our approach to training and organisational development ensures that staff have the necessary ability, skills and training in order to able to undertake the job role. In terms of managing the risks associated with over establishment, all posts are checked against the post book prior to advertising. Where a post is not established it needs to go through specific authorisation and establishment process which ensures that we control the number of posts we recruit.	2	3	6	Discharged				
11	Lack of compliance with legislation resulting in prosecution or compliance order.	Clerk of Authority reviews all Committee reports for legality and advises CFA. Clerk and Solicitor review new legislation. Government notify of all new requirements Horizon scanning.	2	2	4	Discharged

12	Ineffective Health and Safety in the workplace, resulting in prosecution, intervention fees etc.	<ul style="list-style-type: none"> • Health and Safety Management System (HSMS) in place certified to OHSAS 18001:2007 to develop, maintain and continuously improve the HSMS. • Operational Assurance Programme. • HSA3 – workplace inspection programme. • Publication of risk information – Health and Safety Risk and Opportunities Register resulting in service objectives and targets, Generic Risk Assessments, Service Orders, Standard Operating Procedures etc. • External audit and scrutiny through External Auditors. • Health, Safety and Environment Advisory Group / Health and Safety Consultation Meeting monitor performance. • Annual SHE Report presented to CFA. • LFRS SHE Audit and Development Plan to develop, maintain, ensure compliance, review and continuously improve the HSMS. 	3	3	9	Following the independent audit of Health and Safety and Environmental Management Systems carried out as part of our OHSAS 18001 and ISO 14001 certification process non-conformances and opportunities for improvement are collated together into the SHE Audit Improvement Action Plan and monitored to conclusion through the Health, Safety and Environment Advisory Group.	31/12/2019	HoSHE	HoSHE	People & Development
13	Lack of effective Information management impacting on service delivery and support or leading to a breach of data protection/freedom of information or a loss of sensitive/personal information.	<p>A revised structure to deliver Information Management has been implemented. Nominated Data Protection and Freedom of Information Lead Officers to ensure legal obligations met. All freedom of information requests considered by Exec Board.</p> <p>Data encryption in place. Information Management related projects are progressing as scheduled with governance from Programme Board and DCFO as Sponsor. Compliance with the Data Protection Act (DPA) and General Data Protection Regulation (GDPR) remains a priority.</p> <p>A data protection LearnPro module; this will further support the Service in effective information management by increasing staff awareness. The Service has also provided specialist data protection and GDPR training to increase staff knowledge and engagement with the subject matter. Data protection has been added as a standard agenda item to several key Papers in the Service. The appointment of a DPO not only aligns the Service with legislative obligations but also provides the oversight inherent to that post.</p>	3	3	9	<p>Work remains ongoing in order to deliver performance management integration within our District Plan, the first stage of which is to prototype both a CorVu replacement and the integrated planning and performance tool. If successful, this should be developed further to automate the wider District Plan Key Performance Indicators (KPI's). Work also needs to be undertaken to develop the culture within the Service of a more unified approach to managing planning and information and, to that end, a communication strategy should be pursued.</p> <p>More general information tasks related to the Information Management Strategy will be supported by the recruitment of a fixed-term Records Officer</p>	31/12/2019	HoServ Develop	DoSP	Strategy & Planning

14	Delayed mobilisation, impacting on service delivery.	System uses AVLS to locate the nearest available pump, based on anticipated 'run time'. 2014 saw the implementation of a new Global ITN road speed setting developed from historical evidence provided by Cheshire FRS. This implementation along with changes to Station geographical locations, the removal of road restrictions (imposed on the ITN by the developers) and the development of new response plans has seen an improvement in mobilising with appliances arriving with greater accuracy between the proposed and actual run times. Restrictions have been imposed on the system to ensure non critical incidents are attended by the host station whilst preventing a lengthy run time and/or a slow response time. This restriction ensures both the spread of resources is maintain and the continued use of RDS whilst preventing Whole time appliances being taken out of higher risk areas, this also reduces the need for standby/closing in moves.	3	3	9	New road speed algorithms have now been deployed onto a test server at NWFC. This is currently being tested by the four FRS to assess its accuracy. Expected roll out mid 2019.	31/12/2019	HoServ Develop	DoSP	Strategy & Planning
15	High levels of staff absence due to outbreak of Ebola.	On-going liaison with LCC Emergency Planning Dept and LRF. Separate BCP plans developed re large scale staff absence. Enhanced sickness and absence policy implemented. OHU department to provide advice to managers/staff.	1	4	4	Discharged				
16	Lack of clarity on future of FRS, leading to inertia.	The Sir Ken Knight review highlighted a need to review governance arrangements relating to FRAs identified several potential governance models, regional, national, mergers, ambulance, police etc. responsibility for Fire Service has transferred from CLG to Home Office The Policing and Crime Bill (which is currently going through Parliament) introduces measures which require the police, fire and rescue, and ambulance services to collaborate with one another. As a minimum, the legislation requires PCCs to be represented on the relevant fire and rescue authority (FRA) (or its committees) with full voting rights, subject to the consent of the FRA. Alternatively, PCCs have the option of putting forward a business case which may include arrangements to take on responsibility for the governance of fire and rescue; or to become the single employer for fire and police, to deliver greater improvements through the integration of back office functions and maximise the benefits of workforce flexibility. As such future options now appear to be:- • remain as we are • move towards a PCC	2	3	6	Discharged

17	Failure of ESMCP to deliver a viable communication facility.	Emergency Services Mobile Communication Programme (ESMCP) is a national project which will deliver a replacement communications and data service using 4G technology. The new broadband data services will replace the existing private mobile radio system provided by Airwave. Main contracts awarded to EE and Motorola for the network and network equipment respectively. Since the signing of the contract, there has been considerable work done by the suppliers, central programme team and emergency services in the regions. However there are still some areas that need to be resolved, and therefore the original go live for the North West (the first region go-live) September 2017, has moved on 6 months to April 2018. The current Airwave contract has been extended until 2019, in order to ensure that the roll out of the new system is complete before the existing contract ends.	3	3	9	Work is ongoing at both a service and regional level in order to prepare for transition to ESMCP. This is focussed upon coverage, transition planning, device support requirements and evaluation of Home Office (HO) documentation such as the vehicle mounted device specifications. The Programme has reported to the Parliamentary Advisory Committee and prioritised work with both key contractors, these being EE and Motorola. LFRS is managing the project with a dedicated Project Manager through Home Office allocated funding. Significant progress cannot be achieved until after the HO issue the revised National Transition Plan which is expected by February 2019 following anticipated approval of the Full Business Case refresh.	31/12/2019	HoServ Develop	DoSP	Strategy & Planning
18	Inability to maintain service provision in spate conditions	Robust Business Continuity arrangements The published 2017-2022 LFRS Integrated Risk Management Plan recognises the impacts of wide area flooding (P2 increasing weather related events) as does our SOR for 2017. Ensure ESMCP specification recognises communication needs identified Training for LFRS FDOs regarding National Resilience Asset mobilisation and associated Command Support has been delivered, testing via an exercise to be completed LFRS vehicle fleet amended with multi-purpose (4x4) vehicles suitable for use in wide area flooding placed within the fleet, further purchases to follow in 2017/18 to extend the provision to 10. The enhancement of staff PPE with provision of flood suits and associated training is complete. The Lancaster accommodation side (not appliance bay etc.) has been built with flood defences and other mitigation works as per flood risk assessment. Other works include elevating all Station Mobilisation Cabinets that are in Flood risk areas.	3	2	6	Discharged
