The contents of this report relate only to the matters which have come to our attention, which we believe need to be reported to you as part of our audit planning process. It is not a comprehensive record of all the relevant matters, which may be subject to change, and in particular we cannot be held responsible to you for reporting all of the risks which may affect the Authority or all weaknesses in your internal controls. This report has been prepared solely for your benefit and should not be quoted in whole or in part without our prior written consent. We do not accept any responsibility for any loss occasioned to any third party acting, or refraining from acting on the basis of the content of this report, as this report was not prepared for, nor intended for, any other purpose.

Key matters

Factors

Authority developments

We have held regular meetings with the senior finance team at the Authority. During these meetings, we discussed a range of key issues regarding the Authority's general developments, current and projected financial performance, governance issues and regulatory oversight.

The Authority updated its Revenue Budget 22/23 – 26/27 (incorporating the Medium Term Financial strategy (MTFS) in February 2022. This was based upon the latest Local Government Funding Settlement which covered one year. The Authority has set a balanced budget over the 5 year period but recognises the uncertainties in the funding forecasts without a multi year settlement. The current MTFS includes a 1.1% increase in funding for 2022/23 with presumed increases of 1% in subsequent years, a new 'Service Grant' the Authority's share of which was £1.1m, with some element assumed for future years, and a £5 increase in 2022/23 council tax with a 2% increase in future years.

Impact of Covid-19 pandemic/ Her Majesty's Inspectorate of Constabulary and Fire & Rescue Services (HMICFRS)

The outbreak of the coronavirus pandemic continues to impact organisations across the public sector. Over the last two years the Authority has had adapt to work differently were required to be able deliver all of its required services effectively. In January 2021, HMICFRS published the results of it's Covid-19 inspection of the service. It noted the service had adapted and responded to the pandemic effectively. Also that it worked well as part of the Local Resilience Forum, and hadn't allowed the pandemic to significantly impact its financial position.

In December 2021 HMICFRS published its Annual Assessment of Fire and Rescue Services in England 2021 to provide an overall view of the state of the fire and rescue sector. The report highlighted that overall, nationally there had been progress from round 1 inspections with improvements in culture and people and investment in fire protection. An area identified as being problematic was the resourcing and prioritising of prevention work. Other areas identified as requiring further improvement included the diversity of recruitment and challenges around the on-call duty system.

Lancashire Fire and Rescue Service were inspected in November 2021, the results of which are due to be published in the summer 2022. We will consider this assessment as part of our value for money work 2022.

Our response

- As a firm, we are absolutely committed to audit quality and financial reporting in the local government sector. Our proposed work and fee, as set further in our Audit Plan, will be discussed with the Director of Corporate Services and is subject to PSAA agreement.
- We will consider your arrangements for managing and reporting your financial resources as part of our work in completing our value for money work.
- We will continue to provide you with sector updates via our Audit Committee updates.
- We have identified an increased incentive and opportunity for organisations in the public sector to manipulate their financial statements due to increasing financial pressures. We have identified a significant risk around management override of controls – refer to page 9.

Introduction and headlines

Purpose

This document provides an overview of the planned scope and timing of the statutory audit of Lancashire Combined Fire Authority ('the Authority') for those charged with governance.

Respective responsibilities

The National Audit Office ('the NAO') has issued a document entitled Code of Audit Practice ('the Code'). This summarises where the responsibilities of auditors begin and end and what is expected from the audited body. Our respective responsibilities are also set out in the agreed in the Terms of Appointment and Statement of Responsibilities issued by Public Sector Audit Appointments (PSAA), the body responsible for appointing us as auditor of Lancashire Combine Fire Authority. *We draw* your attention to both of these documents.

Scope of our audit

The scope of our audit is set in accordance with the Code and International Standards on Auditing (ISAs) (UK). We are responsible for forming and expressing an opinion on the Authority's financial statements that have been prepared by management with the oversight of those charged with governance (the Audit Committee); and we consider whether there are sufficient arrangements in place at the Authority's for securing economy, efficiency and effectiveness in your use of resources. Value for money relates to ensuring that resources are used efficiently to maximise the outcomes that can be achieved.

The audit of the financial statements does not relieve management or the Audit Committee of your responsibilities. It is the responsibility of the Authority to ensure that proper arrangements are in place for the conduct of its business, and that public money is safeguarded and properly accounted for. We have considered how the Authority is fulfilling these responsibilities.

Our audit approach is based on a thorough understanding of the Authority's business and is risk based.

Significant risks

Those risks requiring special audit consideration and procedures to address the likelihood of a material financial statement error have been identified as:

- Management override of controls
- Valuation of other land and buildings
- Valuation of net pension fund liabilities

We will communicate significant findings on these areas as well as any other significant matters arising from the audit to you in our Audit Findings (ISA 260) Report.

Materiality

We have determined planning materiality to be £1,245k (2020-21 £1,192.5k) for the Authority, which equates to 2% of your prior-year gross expenditure for the year. We are obliged to report uncorrected omissions or misstatements other than those which are 'clearly trivial' to those charged with governance. Clearly trivial has been set at £62.3k (2020/21 £59.6k).

Value for Money arrangements

Our initial risk assessment regarding your arrangements to secure value for money has not identified any risks of significant weaknesses. Pages 17 and 18 outline the approach for 2021/22 and the additional work which we are required to perform and report upon.

Audit logistics

Our interim visit will take place in March 2022 and our final visit will take place in July - October. Our key deliverables are this Audit Plan, our Audit Findings Report and Auditor's Annual Report.

Our fee for the audit will be £40,884 (PY: £38,919) for the Authority, subject to the Authority delivering a good set of financial statements and working papers.

We have complied with the Financial Reporting Authority's Ethical Standard (revised 2019) and we as a firm, and each covered person, confirm that we are independent and are able to express an objective opinion on the financial statements.

Significant risks identified

Significant risks are defined by ISAs (UK) as risks that, in the judgement of the auditor, require special audit consideration. In identifying risks, audit teams consider the nature of the risk, the potential magnitude of misstatement, and its likelihood. Significant risks are those risks that have a higher risk of material misstatement.

Risk	Reason for risk identification	Key aspects of our proposed response to the risk
The revenue and expenditure cycles include fraudulent transactions and/or improper recognition	Under ISA (UK) 240 there is a rebuttable presumed risk that revenue may be misstated due to the improper recognition of revenue. Practice Note 10, issued by the FRC, states auditors should also consider that material misstatements may occur by the manipulation of expenditure recognition. These presumptions can be rebutted if the auditor concludes that there is no risk of material misstatement due to fraud relating to revenue recognition or the manipulation of expenditure recognition. Having considered the risk factors set out in ISA240 and PN10 and the nature of the expenditure streams at the Fund, we have determined that the risk of fraud arising from revenue recognition and expenditure manipulation can be rebutted, because: • there is little incentive to manipulate revenue recognition • opportunities to manipulate revenue recognition and expenditure are very limited • classes of expenditure that could be prone to manipulation, such as management expenses and payments to and on account of leavers are not material • the culture and ethical frameworks of local authorities, including Lancashire Combined Fire Authority, mean that all forms of fraud are seen as unacceptable Therefore we do not consider these to be significant risks for including Lancashire Combined Fire Authority.	We will continue to review revenue transactions as part of our audit ensuring that it remains appropriate to rebut the presumed risk of revenue recognition for the Authority. We will also continue to review material expenditure transactions as part of our audit ensuring that it remains appropriate to rebut the risk of expenditure recognition for the Authority.

Significant risks identified

Risk	Reason for risk identification	Key aspects of our proposed response to the risk
Management over-ride of controls	Under ISA (UK) 240, there is a non-rebuttable presumed risk that the risk of management override of controls is present in all entities. The Authority faces external scrutiny of its spending and this could potentially place management under undue pressure in terms of how they report performance. We therefore identified management override of control, in particular journals, management estimates, and transactions outside the course of business as a significant risk for the Authority, which was one of the most significant assessed risks of material misstatement.	We will: • evaluate the design effectiveness of management controls over journals • analyse the journals listing and determine the criteria for selecting high risk unusual journals • test unusual journals recorded during the year and after the draft accounts stage for appropriateness and corroboration • gain an understanding of the accounting estimates and critical judgements applied made by management and consider their reasonableness with regard to corroborative evidence • evaluate the rationale for any changes in accounting policies, estimates or significant unusual transactions.
Valuation of land and buildings	The Authority revalues its land and buildings on a rolling five yearly basis with 20% of assets valued each year. In the intervening years the Authority requests a confirmation through a desktop exercise from its engaged valuation expert to ensure that there is no material difference. This valuation (£89.983m in 2020/21) represents a significant estimate by management in the financial statements due to the size of the numbers involved and the sensitivity of this estimate to changes in key assumptions. Additionally for land and buildings, management will need to ensure the carrying value in the Authority financial statements is not materially different from the current value or the fair value (for surplus assets) at the financial statements date, where annual valuations are not carried out. We therefore identified valuation of land and buildings as a significant risk, which was one of the most significant assessed risks of material misstatement.	We will: • update our understanding of the processes and controls put in place by management to ensure that the Authority's valuation of land and buildings are not materially misstated and evaluate the design of the associated controls • evaluate management's processes and assumptions for the calculation of the estimate, the instructions issued to valuation experts and the scope of their work • evaluate the competence, capabilities and objectivity of the valuation expert • discuss with the valuer the basis on which the valuation was carried out • challenge the information and assumptions used by the valuer to assess completeness and consistency with our understanding • test revaluations made during the year including investment properties, to see if they had been input correctly into the Authority's asset register • evaluate the assumptions made by management for those assets not revalued during the year and how management has satisfied themselves that these are not materially different to current value at year end.

Significant risks identified

Risk	Reason for risk identification	Key aspects of our proposed response to the risk
Valuation of the net Pension Fund liability	The Authority's pension fund net liability, as reflected in its balance sheet as the net defined benefit liability, represents a significant estimate in the financial statements. The pension fund net liability (£887.280m in 2020/21) is considered a significant estimate due to the size of the numbers involved and the sensitivity of the estimate to changes in key assumptions. We therefore identified valuation of the Authority's pension fund net liability as a significant risk, which was one of the most significant assessed risks of material misstatement.	We will: • update our understanding of the processes and controls put in place by management to ensure that the Authority's pension fund net liability is not materially misstated and evaluate the design of the associated controls; • evaluate the instructions issued by management to their management expert (an actuary) for this estimate and the scope of the actuary's work; • assess the competence, capabilities and objectivity of the actuary who carried out the Authority's pension fund valuation; • assess the accuracy and completeness of the information provided by the Authority to the actuary to estimate the liability; • test the consistency of the pension fund asset and liability and disclosures in the notes to the core financial statements with the actuarial report from the actuary; • undertake procedures to confirm the reasonableness of the actuarial assumptions made by reviewing the report of the consulting actuary (as auditor's expert) and performing any additional procedures suggested within the report; and • obtain assurances from the auditor of Lancashire Pension Fund as to the controls surrounding the validity and accuracy of membership data; contributions data and benefits data sent to the actuary by the pension fund and the fund assets valuation in the pension fund financial statements.

Accounting estimates and related disclosures

The Financial Reporting Council issued an updated ISA (UK) 540 (revised): *Auditing Accounting Estimates and Related Disclosures which* includes significant enhancements in respect of the audit risk assessment process for accounting estimates.

Introduction

Under ISA (UK) 540 (Revised December 2018) auditors are required to understand and assess an entity's internal controls over accounting estimates, including:

- The nature and extent of oversight and governance over management's financial reporting process relevant to accounting estimates;
- How management identifies the need for and applies specialised skills or knowledge related to accounting estimates;
- How the entity's risk management process identifies and addresses risks relating to accounting estimates;
- The entity's information system as it relates to accounting estimates;
- The entity's control activities in relation to accounting estimates; and
- How management reviews the outcomes of previous accounting estimates.

As part of this process auditors also need to obtain an understanding of the role of those charged with governance, which is particularly important where the estimates have high estimation uncertainty, or require significant judgement.

Specifically do Audit Committee members:

- Understand the characteristics of the methods and models used to make the accounting estimates and the risks related to them;
- Oversee management's process for making accounting estimates, including the use of models, and the monitoring activities undertaken by management; and
- Evaluate how management made the accounting estimates?

Accounting estimates and related disclosures

Additional information that will be required

To ensure our compliance with this revised auditing standard, we will be requesting further information from management and those charged with governance during our audit for the year ended 31 March 2022.

Based on our knowledge of the Authority we have identified the following material accounting estimates for which this is likely to apply:

- Valuations of land and buildings
- Depreciation
- Year end provisions and accruals
- Valuation of defined benefit net pension fund liabilities

The Authority's Information systems

In respect of the Authority's information systems we are required to consider how management identifies the methods, assumptions and source data used for each material accounting estimate and the need for any changes to these. This includes how management selects, or designs, the methods, assumptions and data to be used and applies the methods used in the valuations.

When the models used include increased complexity or subjectivity, as is the case for many valuation models, auditors need to understand and assess the controls in place over the models and the data included therein. Where adequate controls are not in place we may need to report this as a significant control deficiency and this could affect the amount of detailed substantive testing required during the audit.

If management has changed the method for making an accounting estimate we will need to fully understand management's rationale for this change. Any unexpected changes are likely to raise the audit risk profile of this accounting estimate and may result in the need for additional audit procedures.

We are aware that the Authority uses management experts in deriving some of its more complex estimates, e.g. asset valuations and pensions liabilities. However, it is important to note that the use of management experts does not diminish the responsibilities of management and those charged with governance to ensure that:

- All accounting estimates and related disclosures included in the financial statements have been prepared in accordance with the requirements of the financial reporting framework, and are materially accurate;
- There are adequate controls in place at the Authority (and where applicable its service provider or management expert) over the models, assumptions and source data used in the preparation of accounting estimates.

Estimation uncertainty

Under ISA (UK) 540 we are required to consider the following:

- How management understands the degree of estimation uncertainty related to each accounting estimate; and
- How management address this estimation uncertainty when selecting their point estimate.

For example, how management identified and considered alternative, methods, assumptions or source data that would be equally valid under the financial reporting framework, and why these alternatives were rejected in favour of the point estimate used.

The revised standard includes increased emphasis on the importance of the financial statement disclosures. Under ISA (UK) 540 (Revised December 2018), auditors are required to assess whether both the accounting estimates themselves and the related disclosures are reasonable.

Where there is a material uncertainty, that is where there is a significant risk of a material change to the estimated carrying value of an asset or liability within the next year, there needs to be additional disclosures. Note that not all material estimates will have a material uncertainty and it is also possible that an estimate that is not material could have a risk of material uncertainty.

Where there is material estimation uncertainty, we would expect the financial statement disclosures to detail:

- What the assumptions and uncertainties are;
- How sensitive the assets and liabilities are to those assumptions, and why;
- The expected resolution of the uncertainty and the range of reasonably possible outcomes for the next financial year; and
- An explanation of any changes made to past assumptions if the uncertainly is unresolved.

Planning enquiries

As part of our planning risk assessment procedures, we have sent planning enquiries letters i.e., Informing the audit risk assessment and Accounting estimate management summary, which consist of a series of questions about obtaining an understanding of management processes and those charge with governance's oversight of the following areas: general enquiries of management, fraud, laws and regulations, related parties, and accounting estimates.

Further information

Further details on the requirements of ISA (UK) 540 (Revised December 2018) can be found in the auditing standard on the Financial Reporting Council's website:

https://www.frc.org.uk/getattachment/0fa69c03-49ec-49ae-a8c9-cc7a2b65382a/ISA-(UK)-540_Revised-December-2018_final.pdf

Other matters

Other work

In addition to our responsibilities under the Code of Practice, we have a number of other audit responsibilities, as follows:

- We read your Narrative Report and Annual Governance Statement to check that they are consistent with the financial statements on which we give an opinion and our knowledge of the Authority.
- We carry out work to satisfy ourselves that disclosures made in your Annual Governance Statement are in line with requirements set by CIPFA.
- We carry out work on your consolidation schedules for the Whole of Government Accounts process in accordance with NAO group audit instructions.
- We consider our other duties under legislation and the Code, as and when required, including:
  - giving electors the opportunity to raise questions about your 2021/22 financial statements, consider and decide upon any objections received in relation to the 2021/22 financial statements;
  - issuing a report in the public interest or written recommendations to the Authority under section 24 of the Local Audit and Accountability Act 2014 (the Act).
  - application to the court for a declaration that an item of account is contrary to law under section 28 or a judicial review under section 31 of the Act
  - issuing an advisory notice under section 29 of the Act
- We certify completion of our audit.

Other material balances and transactions

Under International Standards on Auditing, "irrespective of the assessed risks of material misstatement, the auditor shall design and perform substantive procedures for each material class of transactions, account balance and disclosure". All other material balances and transaction streams will therefore be audited. However, the procedures will not be as extensive as the procedures adopted for the risks identified in this report.

Materiality

The concept of materiality

Materiality is fundamental to the preparation of the financial statements and the audit process and applies not only to the monetary misstatements but also to disclosure requirements and adherence to acceptable accounting practice and applicable law. Misstatements, including omissions, are considered to be material if they, individually or in the aggregate, could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

Materiality for planning purposes

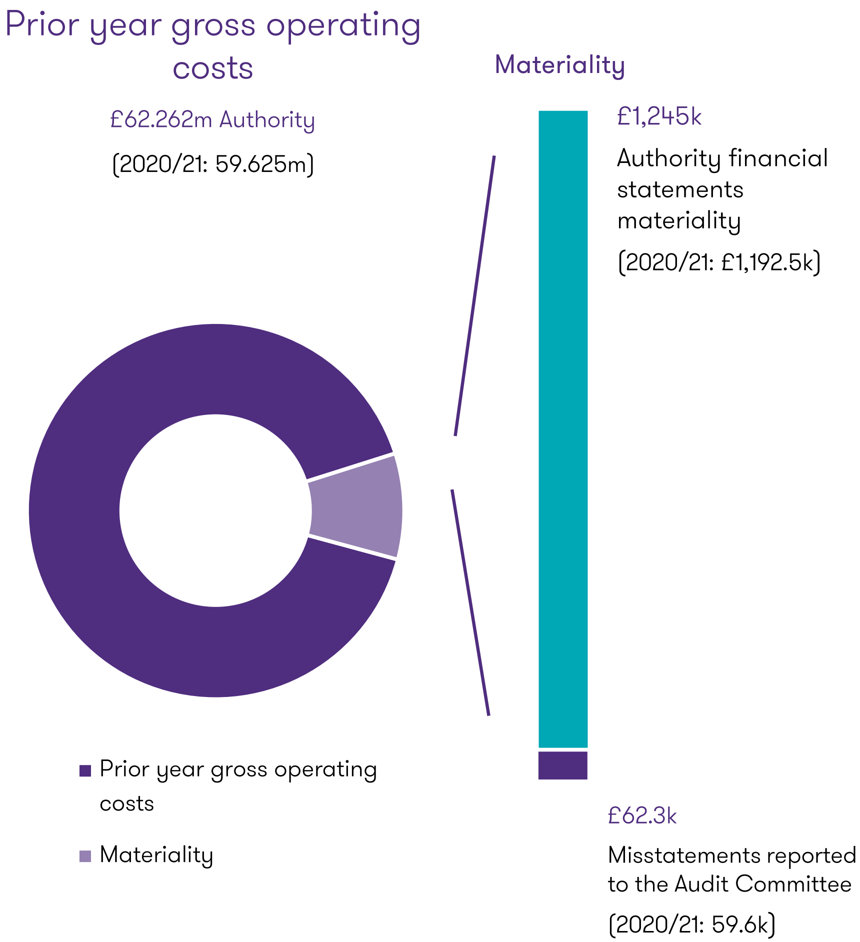
We have determined financial statement materiality based on a proportion of the gross expenditure of the Authority for the prior financial year. In the prior year we used the same benchmark. Materiality at the planning stage of our audit is £1,1245k (2020/21 £1,192.5k) for the Authority, which equates to 2% of your forecast gross expenditure for the year. We design our procedures to detect errors in specific accounts at a lower level of precision which we have determined to be £20k for Senior officer remuneration.

We reconsider planning materiality if, during the course of our audit engagement, we become aware of facts and circumstances that would have caused us to make a different determination of planning materiality.

Matters we will report to the Audit Committee

Whilst our audit procedures are designed to identify misstatements which are material to our opinion on the financial statements as a whole, we nevertheless report to the Audit Committee any unadjusted misstatements of lesser amounts to the extent that these are identified by our audit work. Under ISA 260 (UK) 'Communication with those charged with governance', we are obliged to report uncorrected omissions or misstatements other than those which are 'clearly trivial' to those charged with governance. ISA 260 (UK) defines 'clearly trivial' as matters that are clearly inconsequential, whether taken individually or in aggregate and whether judged by any quantitative or qualitative criteria. In the context of the Authority, we propose that an individual difference could normally be considered to be clearly trivial if it is less than £62.3k (2020/21 £59.6k).

If management have corrected material misstatements identified during the course of the audit, we will consider whether those corrections should be communicated to the Audit Committee to assist it in fulfilling its governance responsibilities.



IT audit strategy

In accordance with ISA (UK) 315, we are required to obtain an understanding of the information systems relevant to financial reporting to identify and assess the risks of material misstatement. As part of this we obtain an understanding of the controls operating over relevant Information Technology (IT) systems i.e., IT general controls (ITGCs). Our audit will include completing an assessment of the design of ITGCs related to security management; technology acquisition, development and maintenance; and technology infrastructure. Based on the level of assurance required for each IT system the assessment may focus on evaluating key risk areas ('streamlined assessment') or be more in depth ('detailed assessment').

The following IT system has been judged to be in scope for our audit and based on the planned financial statement audit approach we will perform the indicated level of assessment:

IT system	Audit area	Planned level IT audit assessment
Oracle E-Business Suite Finance	Financial reporting	• Streamlined assessment
I-Trent	Payroll	• Streamlined assessment

Value for Money arrangements

Approach to Value for Money work for 2021/22

The National Audit Office(NAO) issued updated guidance for auditors in April 2020. The Code requires auditors to consider whether the body has put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources . When reporting on these arrangements, the Code requires auditors to structure their commentary on arrangements under three specified reporting criteria. These are as set out below:

Improving economy, efficiency and effectiveness

Arrangements for improving the way the body delivers its services. This includes arrangements for understanding costs and delivering efficiencies and improving outcomes for service users.

Financial Sustainability

Arrangements for ensuring the body can continue to deliver services. This includes planning resources to ensure adequate finances and maintain sustainable levels of spending over the medium term (3-5 years)

Governance

Arrangements for ensuring that the body makes appropriate decisions in the right way. This includes arrangements for budget setting and management, risk management, and ensuring the body makes decisions based on appropriate information

Risks of significant VFM weaknesses

As part of our planning work, we considered whether there were any risks of significant weakness in the body's arrangements for securing economy, efficiency and effectiveness in its use of resources that we needed to perform further procedures on. We did not identify any risks of significant weakness in the Fire Authority's arrangements for securing economy, efficiency and effectiveness in its use of resources. The potential different types of recommendations we could make are set out in the second table below.

Risks of significant weakness

Those risks requiring audit consideration and procedures to address the likelihood that proper arrangements are not in place at the body to deliver value for money.

At this stage of our audit work we have not identified any significant weaknesses. However under the new VFM arrangement we will be considering the Authority's arrangements in place across the three criteria areas of finance, governance and performance. To be clear, similar to 2020/21, this represents a more detailed level of audit work required under the new VFM Code than previously (prior to 2020/21). We will be commenting on the Authority's arrangements across the three criteria in our Auditor's Annual Report.

We will continue to monitor the Authority's finances from its outturn for 2021/22 to its planned position for 2022/23 and beyond.

We will keep under review the possibility of a significant weakness arising as part of our ongoing 2021/22 VFM review.

Our findings will be summarised in the Auditor's Annual Report, to be agreed with management later this year.

Potential types of recommendations

A range of different recommendations could be made following the completion of work on risks of significant weakness, as follows:

Statutory recommendation

Written recommendations to the body under Section 24 (Schedule 7) of the Local Audit and Accountability Act 2014. A recommendation under schedule 7 requires the body to discuss and respond publicly to the report.

Key recommendation

The Code of Audit Practice requires that where auditors identify significant weaknesses in arrangements to secure value for money they should make recommendations setting out the actions that should be taken by the body. We have defined these recommendations as 'key recommendations'.

Improvement recommendation

These recommendations, if implemented should improve the arrangements in place at the body, but are not made as a result of identifying significant weaknesses in the body's arrangements

Audit logistics and team

Georgia Jones, Key Audit Partner

Leads our relationship with you and takes overall responsibility for the delivery of a high quality audit, meaning the highest professional standards and adding value to the Authority.

Helen Stevenson, Audit Manager

Plans and manages the delivery of the audit including regular contact with senior officers.

Isaac Awomokun, Audit Incharge

Key audit contact responsible for the day-to-day management and delivery of the audit work.

Audited body responsibilities

Where audited bodies do not deliver to the timetable agreed, we need to ensure that this does not impact on audit quality or absorb a disproportionate amount of time, thereby disadvantaging other audits. Where the elapsed time to complete an audit exceeds that agreed due to a client not meeting its obligations we will not be able to maintain a team on site. Similarly, where additional resources are needed to complete the audit due to a client not meeting their obligations we are not able to guarantee the delivery of the audit to the agreed timescales. In addition, delayed audits will incur additional audit fees.

Our requirements

To minimise the risk of a delayed audit, you need to ensure that you:

- produce draft financial statements of good quality by the agreed timetable you have agreed with us, including all notes, the Narrative Report and the Annual Governance Statement
- ensure that good quality working papers are available at the start of the audit, in accordance with the working paper requirements schedule that we have shared with you
- ensure that the agreed data reports are available to us at the start of the audit and are reconciled to the values in the accounts, in order to facilitate our selection of items for testing
- ensure that all appropriate staff are available on site throughout (or as otherwise agreed) the planned period of the audit
- respond promptly and adequately to audit queries.

Audit fees

In 2018, PSAA awarded a contract of audit for [insert client name] to begin with effect from 2018/19. The fee agreed in the contract was £x. Since that time, there have been a number of developments, particularly in relation to the revised Code and ISA's which are relevant for the 2021/22 audit.

Across all sectors and firms, the FRC has set out its expectation of improved financial reporting from organisations and the need for auditors to demonstrate increased scepticism and challenge and to undertake additional and more robust testing, as detailed on page [X] in relation to the updated ISA (UK) 540 (revised): Auditing Accounting Estimates and Related Disclosures.

As a firm, we are absolutely committed to meeting the expectations of the FRC with regard to audit quality and public sector financial reporting. Our proposed work and fee for 2021/22, as set out below, is detailed overleaf and has been agreed with the Director of Corporate Services.

	Actual Fee 2019/20	Actual Fee 2020/21	Proposed fee 2021/22
Lancashire Combined Fire Authority Audit	£28,169	£38,919	£40,844
Total audit fees (excluding VAT)	£28,169	£38,919	£40,844

Assumptions

In setting the above fees, we have assumed that the Authority will:

- prepare a good quality set of financial statements , supported by comprehensive and well presented working papers which are ready at the start of the audit
- provide appropriate analysis, support and evidence to support all critical judgements and significant judgements made during the course of preparing the financial statements
- provide early notice of proposed complex or unusual transactions which could have a material impact on the financial statements.

Relevant professional standards

In preparing our fee estimate, we have had regard to all relevant professional standards, including paragraphs 4.1 and 4.2 of the FRC's Ethical Standard (revised 2019) which stipulate that the Engagement Lead (Key Audit Partner) must set a fee sufficient to enable the resourcing of the audit with partners and staff with appropriate time and skill to deliver an audit to the required professional and Ethical standards.

Independence and non-audit services

Auditor independence

Ethical Standards and ISA (UK) 260 require us to give you timely disclosure of all significant facts and matters that may bear upon the integrity, objectivity and independence of the firm or covered persons. relating to our independence. We encourage you to contact us to discuss these or any other independence issues with us. We will also discuss with you if we make additional significant judgements surrounding independence matters.

We confirm that there are no significant facts or matters that impact on our independence as auditors that we are required or wish to draw to your attention. We have complied with the Financial Reporting Council's Ethical Standard (Revised 2019) and we as a firm, and each covered person, confirm that we are independent and are able to express an objective opinion on the financial statements. Further, we have complied with the requirements of the National Audit Office’s Auditor Guidance Note 01 issued in May 2020 which sets out supplementary guidance on ethical requirements for auditors of local public bodies. We confirm that we have implemented policies and procedures to meet the requirements of the Ethical Standard. For the purposes of our audit we have made enquiries of all Grant Thornton UK LLP teams providing services to the Authority.

Other services

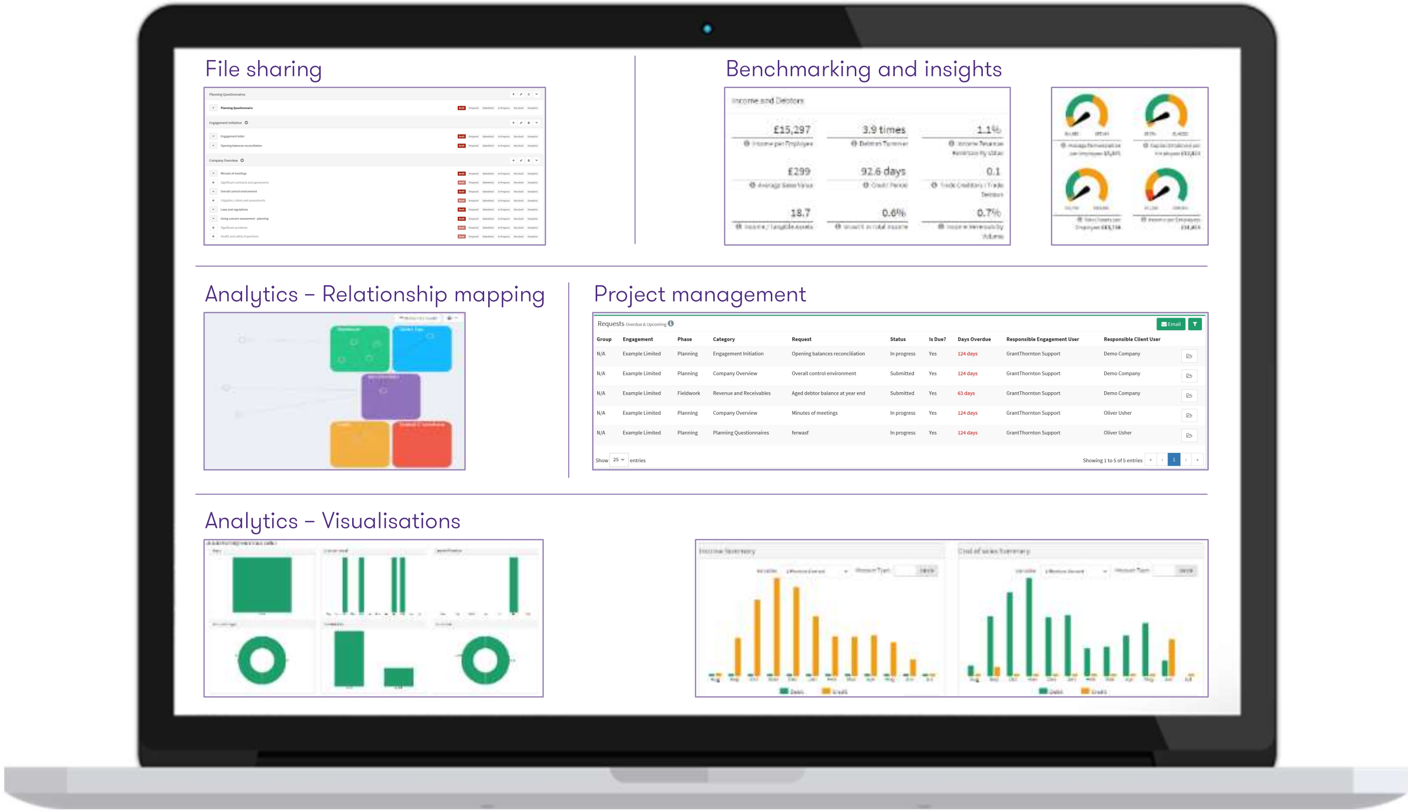
No other services provided by Grant Thornton were identified.

Any changes and full details of all fees charged for audit related and non-audit related services by Grant Thornton UK LLP and by Grant Thornton International Limited network member Firms will be included in our Audit Findings report at the conclusion of the audit.

Our digital audit experience

A key component of our overall audit experience is our comprehensive data analytics tool, which is supported by Inflo Software technology. This tool has a number of key functions within our audit process:

Function	Benefits for you
Data extraction	Providing us with your financial information is made easier
File sharing	An easy-to-use, ISO 27001 certified, purpose-built file sharing tool
Project management	Effective management and oversight of requests and responsibilities
Data analytics	Enhanced assurance from access to complete data populations



Grant Thornton's Analytics solution is supported by Inflo Software technology

Our digital audit experience

A key component of our overall audit experience is our comprehensive data analytics tool, which is supported by Inflo Software technology. This tool has a number of key functions within our audit process:

Data extraction

- Real-time access to data
- Easy step-by-step guides to support you upload your data

File sharing

- Task-based ISO 27001 certified file sharing space, ensuring requests for each task are easy to follow
- Ability to communicate in the tool, ensuring all team members have visibility on discussions about your audit, reducing duplication of work

Project management

- Facilitates oversight of requests
- Access to a live request list at all times

Data analytics

- Relationship mapping, allowing understanding of whole cycles to be obtained quickly
- Visualisation of transactions, allowing easy identification of trends and anomalies

How will analytics add value to your audit?

Analytics will add value to your audit in a number of ways. We see the key benefits of extensive use of data analytics within the audit process to be the following:

Improved fraud procedures using powerful anomaly detection

Being able to analyse every accounting transaction across your business enhances our fraud procedures. We can immediately identify high risk transactions, focusing our work on these to provide greater assurance to you, and other stakeholders.

Examples of anomaly detection include analysis of user activity, which may highlight inappropriate access permissions, and reviewing seldom used accounts, which could identify efficiencies through reducing unnecessary codes and therefore unnecessary internal maintenance.

Another product of this is identification of issues that are not specific to individual postings, such as training requirements being identified for members of staff with high error rates, or who are relying on use of suspense accounts.

More time for you to perform the day job

Providing all this additional value does not require additional input from you or your team. In fact, less of your time is required to prepare information for the audit and to provide supporting information to us.

Complete extracts from your general ledger will be obtained from the data provided to us and requests will therefore be reduced.

We provide transparent project management, allowing us to seamlessly collaborate with each other to complete the audit on time and around other commitments.

We will both have access to a dashboard which provides a real-time overview of audit progress, down to individual information items we need from each other. Tasks can easily be allocated across your team to ensure roles and responsibilities are well defined.

Using filters, you and your team will quickly be able to identify actions required, meaning any delays can be flagged earlier in the process. Accessible through any browser, the audit status is always available on any device providing you with the information to work flexibly around your other commitments.

Appendix 1: Progress against prior year audit recommendations

We identified the following issues in our 2020/21 audit of the Authority's financial statements, which resulted in one recommendation being reported in our 2020/21 Audit Findings Report. We will be following up on the implementation of our recommendations in the 2021/22 audit.

Assessment	Issue and risk previously communicated	Update on actions taken to address the issue
Low	Self-authorisation of journals Our risk assessment of journal controls identified that there are no automated controls on the finance system to prevent members of finance staff approving their own journals. Whilst our audit work on journals did not identify any significant issues as a result of this weakness in internal controls, we recommended that the Authority establishes an authorisation control to reduce the risk of financial reporting fraud and/or error in future.	To be followed up during 2021-22
